

AP Chemistry Summer Assignment 2020

Dear Student,

The purpose of having an AP Chemistry summer assignment is, for the most part, to review material that was introduced or in some instances not covered in honors chemistry. For those of you making the transition from the college prep level, some of the topics and/or applications of the material will be new to you. The summer assignment will be available on Google Sites throughout the summer. There will be a tutorial and self-assessment for each of the topics assigned.

<https://sites.google.com/a/https.us/ap-chemistry/summer-assignment>

You will be tested on the material on the second day of class in September. Continued Enrollment in the course is contingent upon you scoring a minimum grade of 80% on that test.

Please do not hesitate to contact me at cmeyer@https.us over the summer if you run into any difficulties. I will be checking my email every couple of days. I look forward to working with you next year!

Sincerely,
Mrs. Meyer
